A simple social media application

HOMEPAGE - Sylvia

This will be our main page for users who aren't signed in. This page will allow users to sign up or sign in to their accounts.
When the sign-up button is clicked a sign-up pop up comes up
When the log in button is clicked a log in pop up comes up

SIGN UP - Afrah

This will be a pop-up page where the user signs up for the application.

LOG IN - Sylvia

This will also be a pop-up page where the user signs into their account.

HOMEPAGE - LOGGED IN (USER) – Joint effort by Afrah and Sylvia

This is the home page for a non-admin user who is signed in. It will allow them to post, comment on posts, look up other users, edit their account, and also receive notifications. Usernames are clickable in this app, when a username is clicked, a new page with the users profile comes up, only difference is you can't edit the account. Users need to be verified before they can log in.

EDIT ACCONT (USER) - Sylvia

This is the home page for a non-admin user who is signed in. It will allow them to post, comment on posts, look up other users, edit their account, and also receive notifications.

HOMEPAGE - LOGGED IN (ADMIN) - Afrah

This is the home page for admin users who are signed in. This page will be slightly similar in design the homepage for regular users. The admin is not allowed to post from their account. The admin homepage shows users who are waiting to be verified, it also has a list of users who have flagged posts. A post is flagged if it contains certain keywords and the admin has the ability to delete their account or delete the post.
